

## Ciao

We sure hope everyone is having a great summer! You'll have to forgive us for not releasing a newsletter in a while- there has been so much going on. In our last update, we were moving to a new location. In fact, we moved twice! We are growing again and it was time to get our own office space that should last us for a few years. We've signed a lease for 9200 sq/ft of office space! Our new office is located at 9909 Huennekens Street, Suite 110 in San Diego. If you are in the area, we'll be having an open house towards the end of September once the dust settles. Email us using the link below if you'd like to make sure you get an invitation.

## MemCPU™ XPC SaaS Update

Do you face integer linear programming problems that are taking you hours or longer? Would you like to see these complete in seconds? If so, you should sign up to be a free beta customer of our SaaS.

We are entering the beta in the beginning of September. In the beta, we have much improved the api and simplified automation, providing sample python code that also includes tremendous visualizations. We're also adding GPU support (press release to come) where we are seeing additional improvements of 30-100x over our current exponential acceleration.

Join the alpha users who are taking advantage of our freemium model designed to allow you to freely use the SaaS for development and test and which currently has no expiration. Sign up [here](#)

## MemComputing at Upcoming Events

### Energy and Clean Technology Venture Forum

We are extremely proud to be selected to present at the 2019 Energy & Clean Technology Forum. It is the largest energy and clean technology venture capital conference in the southwest, and is being held at Rice University on September 11 & 12. This event will showcase over 60 companies, each giving a 4-minute business pitch to investors, corporate innovation groups, and Forum attendees. We hope to be recognized as one of the "10 Most Promising Companies" as we believe our technology has incredible applications in the Oil/Gas & Energy sectors. We look forward to establishing more industry contacts and learning about potential investment opportunities. Learn more about the event here:

**Listen to an interview with our CEO**

Earlier this month, our CEO, John Beane was featured on the Opt Out Podcast, where he discussed his entrepreneurial experience and career in technology.

Dive in and listen to his story here: <https://lnkd.in/gfS8R3e>.
